3 TYPES OF SERVICES

When a person facilitates happiness and evolvment in the body, mind, intellect or soul plane of another person without any expectation in return, then this act can be defined as ‘Service’.

According to the Biblical saying – ‘Do unto others as you would have them do unto you’, any Soul that understands the Natural law- ‘when we serve others we get what we want by default’, will enter into ‘Service’.

‘Service’ is categorized into 3 types based on the level of maturity of the soul. There is complete transformation in the mode of service as the soul progresses from the basic to evolved state.

When there is a misappropriation in the choice of service it is as good as digging ones own grave. Hence let us understand the 3 types of service.

SOCIAL SERVICE

This kind of service is widely known to all. Human beings on this earth have been involved charity of all kind – food, shelter, clothing, education, land etc. In this process they are contributing only to the well being of that particular day, month or lifetime. This offers contentment only to the body and mind.

In fact the soul may consider this as the right kind of service in its initial incarnations. This service helps in understanding the truth that ‘I am the same as the other’ and also that ‘We can find true happiness only in the service of others’.

Feeding a hungry man, giving clothes to those deprived and so on - thus, ‘**Social service**’ is that which is done in view of superficial happiness and instant results.

However, it is important that every man is duty minded and is able to stand on his feet independently. He should be able to earn his own livelihood. ‘Whether we are born poor, rich or in between’, is something that we decide even before coming to this

earth. So why do we reach this deplorable state of not being able to even earn our own livelihood and having to beg for alms? Once we start analyzing this in depth, then we start understanding the ‘Spiritual reason’ behind.

SERVICE OF SURRENDER

This is very similar to the above kind of service. Here also there is service related to food, clothing and shelter. But they are rendered in front of a God figure (photo, idol etc) or Swamiji (Guru).

Therefore, the person receiving such help is left with an impression that the God figure or Swamiji is the provider of this help. He creates a sense of devotion towards them and forms a belief system that they can clear all his problems.

In a way, the great spiritual lesson - the ‘service of surrender’ is taught here. To be more explicit, we can say that there is hundred percent chance of an atheist transforming into a theist.

In fact, as the saying goes - ‘truth reveals itself with time’ – similarly, problems are resolved by themselves when left to time.

Such time bound issues and those where people drain their energy, will power and problem solving ability due to self-pity – are perfect cases that can be resolved by a feeling of ‘surrender’.

When one completely transfers the responsibility of one's problem to God or a Swamiji and feels one is insignificant; relaxes completely and continues with his activity otherwise; then their problem is definitely resolved. The reasons are as follows –

1. Time bound issues resolve by themselves.
2. One may gain energy and thereby will power to resolve the problem, because of repeated pondering over the issue.
3. People who are into social service may not depend on anything and feel that they are entirely responsible for everything. In this vicious cycle of problems, they may not be able to focus on the present problem and get trapped in some more problems. Which means that they simply take their mind off that particular problem.

Hence service of surrender is definitely better than social service. However after a stage this becomes a big obstacle for the wisdom-eye.

Service through Spiritual Science

As far as the soul is concerned, it is a fact that ‘nobody is responsible for the making or breaking of others’. It is the same thing when Sri Krishna says in the Geeta - ‘everybody is responsible for their own upliftment’, or the great Philosopher Seth says – ‘You are the creator of your own truth’. Hence there is nothing called ‘service’. There is only sharing of one’s experience with another.

We came into this wonderful school of learning called earth for happiness. As a part of which, the sharing of this happiness and self-experience, results in double the effect. We have been bestowed with the gift of ‘speech’ only to share such soulful experiences and sweet memories.

Thus, we can define the service through spiritual science as the sharing of spiritual path, knowledge path and soul experiences with others, thereby contributing to the soulful up gradation of individual or society as a whole.

Here there is no thought of food, dwelling or clothing

at all. There is no scope for thinking that ‘somebody above has done something for us’. Meditate! Beget knowledge! It will give you salvation.

SALVATION

Salvation here means liberation from all disease, and sorrow. It means that this is the last birth and the stage where one reaches enlightenment. We have to understand that others can only share their experiences and show the path. It is for us to follow them and the disciplined practice like them, we will definitely get what we deserve.

‘Spiritual Science Service’ is that which is done by an evolved soul in the last stage of the birth and death cycle. Jesus, Krishna and the likes may have performed many miracles physically during their lifetime. However after that they left the treasure of

soul wisdom in the form of The Bible, The Bhagavat Geeta or The Ashtanga Marga or the eight fold path. They did not leave behind temporary physical needs required for mundane existence.

Because, they knew -‘only spiritual knowledge can come to ones aid at all times’. So they ascended after having rendered such noble spiritual science service. Let us travel the same path as theirs!

SPIRITUAL SCIENTISTS

All those, that we praise as complete and pray as Gods, have been great Spiritual scientists once upon a time.

They have all attained the supreme consciousness after disciplined practice in their cycle of birth and death. They have acquired the power to create any kind of miracle. But they chose to spend the last life in the propagation of spirituality and sharing spiritual wisdom and ascended to higher worlds.

Jesus Christ(Bible), Zoroaster(Gathas and Yasna Hapthanghaiti), Allah(Quran), Sri Krishna(Bhagavat Geeta) – each of them have only propagated knowledge and spiritual wisdom in their last lives. We should understand that apart from our personal happiness, contributing towards enhancing spiritual values in other people or society is ‘something that we do for ourselves’.

As Jesus says, we have to give to others what we want to be given ourselves. So when we desire spiritual knowledge, when we seek help from above, all we can do at our level is to share our experience.

How To Render Spiritual Science Service...?

We can either learn more or aid in the spiritual growth of others in such service. On the whole, spiritual science service comprises of conducting meditation classes, propagation of spirituality in rural areas through various mediums, sharing knowledge to people in such places, building pyramids and helping in building them etc.

We can also serve by way of publishing our spiritual experiences in the form of books and sharing them, distributing pamphlets and involving in any other activity that helps in elevating the self.

In fact, there is no need to know many things for scientific spiritual service! It is enough to understand the basic concepts - ‘meditation is observing the breath’; once we learn meditation, the right food for the body is vegetarian food; meditation in a Pyramid is three times more effective.

To Elevate From Individual Consciousness To Supreme Oneness ...

This constitutes of the entire spiritual science. ‘Pragnanam Brahma’ means Supreme consciousness itself is God. Once we know this essence of the Vedas and start implementing it, we gain spiritual knowledge and realize the eternal truth ‘Aham Brahmasmi’ – I am God!

Once we realize this truth, then the next step will be to understand – Sarvam Khalvidam Brahma’ – everything is consciousness. Every object and all matter is Divine consciousness itself.

Then we have to make others know – ‘Tatvamasi’ – I am the same as you. So, this ‘Spiritual Science Service’ is the process of elevating ourselves from ‘I am God’ state to a state of Oneness where ‘everything is Divine’.

WE ARE OMNIPRESENT

After attaining such a great state, we automatically imbibe qualities like kindness, pity, compassion, love etc.

Also, it is a great phenomenon where we are not limited to the boundaries of this mortal body in flesh and blood but filled with a consciousness that we are spread everywhere. It also creates oneness with others through this consciousness of Omnipresence.

Spiritual Science Service happens only when we know the experiences of others; share our experiences and give and take knowledge.

Those who understand that Spiritual service is a part of this drama of life and dedicate their last lives completely to this service, are able to ascend to other planes and are liberated from the cycle of birth and death.

It is generally observed that the patients of Spiritual health centers suffer from diseases related to spiritual service. That is why this tablet has been formulated

as a significant one in this research.

All problems related to the hands, spondylitis, shoulder and nerve related problems are connected to the above concept. Let us deal with them in detail in context with those particular body parts.

SOUL SCANNING

1. In the initial stages, the soul is involved in the service related to basic amenities of life like food, clothing and shelter.
2. In the next stages of soul the same services are rendered in a spiritual ambience (ashrams, missionaries etc)
3. When the soul is in the final stage of evolution, it reaches a state where it shares only knowledge and wisdom of the spiritual path.
4. Even if one is involved in the basic services of food, shelter and clothing initially, once they realize the value of knowledge and spiritual wisdom, they should completely divert themselves towards scientific spiritual service.
5. We have no right to interfere in the karmic wheel of others by way of macro management in extending help. By doing so, we have to carry their difficulties. This is something pertaining only to evolved souls.

6. To understand the ‘3 Types of Services’ further, one has to read ‘Yoga parampara’(Brahmarshi Patriji) mentioned in the book ‘5 Tablets’.

7. The accessories used on hands like rings, bangles, watch, full hands shirts, cuffs, cheque books, money purse, hand bags, cooking ladles, dining table etc and the positive and negative experiences related to all these are all indicative of the transition in the above mentioned phases. One can discuss with Spiritual health experts and learn about them in detail.

8. The area from fingers of the hand to the neck i.e. skin problems on the hand, mild joint pains, fracture of the hand, frozen shoulder, paralysis resulting in dysfunction of hand and all other neck to hand area problems, are a result of poor understanding of the nature of services to be rendered at a particular phase!

9. According to the level of maturity of soul and our past life we can categorize the suitable service to be rendered and enhance our spiritual wisdom. Thereby, we can observe the physical, mental and social changes that happen in immediate succession and everything falls into place! The real disease is to

rigidly continue believe that ‘what I know is the only truth’.

10. If the first stage in a man’s life is independently standing on one’s own feet, then the final stage is the service of sharing that happiness and knowledge with others(the variants of the unified self). To expect returns for our service from others is to expect from ourselves only. When we understand this ironical fact, only then we can push ourselves into appropriate service.

EXPERIENCES

‘One must endure what one deserves!’ - My name is D.V. Krishnarao. I work in LIC of India as an assistant. I came into the path of meditation because of my wife ‘Rekha’ in the year 2007.

Since childhood I liked to do social service. I got a job in LIC in 1992. Since then, I took up the responsibility of leading the employees union. Later I bought an apartment in Gajuwaka in 2007. There, 860 apartments were collectively called ‘Visweswarayanagar’. I worked as the general secretary there to attend to the basic facilities of the colony. I offered my services for water supply, roads, ration cards, voter cards and other facilities. I used to feel that ‘I am doing lot of good things which are useful for many people’. Along with these I also used to meditate, attend meditation classes and built a ‘Pyramid’ in our native village. But my prime concern was social service.

In 2011, my life took unexpected turns. I was targeted in my office and faulty vigilance cases were registered on me. I was taken to trial. Until then I had

no financial problems. Suddenly I faced severe financial crisis and was in debt. Also my son met with a bike accident as a result of which another person died. I had to compensate the family of the deceased with 2 lakh rupees in the fear being involved in police cases.

Thus I was suddenly suffocated by problems, stress and financial crisis. I felt as if my whole life had turned upside down. ‘I have not caused any harm to anybody. Why is this happening to me?’ At this juncture I had a counseling with Dr GK. I explained my situation.

Then Dr GK said – ‘You have been carrying the burden of the karmic effects of the social service that you have been doing and the people that you have been helping in the name of social service. Everybody has to go through the karmic cycle in his or her life. You have been interfering in this karmic wheel by not letting them endure the effects of their karma and helping them out of it. Hence you are now facing the after effects of that. Now you need not quit service. But the real service that you have to do now is, to enlighten people that come to you, with soul wisdom. The more spiritual service you render, the

sooner will you be relieved of your problems.’

Since then, I started working in the Pyramid spiritual health project. I have found inexplicable peace in spiritual science service. There are positive indications in everything now. Then onwards, I have been following Dr GK’s instructions and rendering spiritual service. Also I saw many changes like getting a job that I loved since childhood, learning music (in spite of so many problems), conducting administration related classes etc. I am thankful to meditation and soul wisdom. I have learnt by personal experience that spiritual science service is greater than social service. I am thankful to Dr GK and Nanda Prasad who have guided me all along. I am now determined to be dedicated in spiritual science service till my last breath.

‘Service is something that we render unto ourselves’ – My name is N. Krishnaveni. I am from Yelamanchili in Vizag district. I have been meditating since 4 years. I have been introduced by ‘Pyramid health center’ in Yelamanchili.

My father brought me up like a son. I always wanted to work. Due to many reasons, my education came to

end in the second year of intermediate. A voluntary service organization called ORRP advertised jobs for girls qualified with intermediate education. I happily joined them in spite of resistance from the family. Thus I started social service. I was the coordinator for many activities like setting up women welfare groups, saving societies, adult education programs, setting up old age homes, planting trees and plants etc.

I underwent two major surgeries. I was fed up with health issues. In 2010 I was introduced to meditation and in the same year a 'Pyramid spiritual center' was established in our house. On the 1st of April 2011 there was a meditation program with Patriji at Yelamanchili. Then I made a promise to him. I will render selfless service, I will lead a simple life with high thinking and teach meditation to rural people and enlighten them with the power of Pyramid. However I could not implement it immediately. Later from 8-10-2014 to 16-11-2014, for 40 days I stayed at a village - P.S.Pet, Chodavaram and I educated the locals about meditation, vegetarianism and Pyramid Power. This program was conducted in the 18X18 'Vighneswara Pyramid' in that village.

I learnt in social service that I could uplift none. Material services make people dependent. ‘Spiritual Science Service’ gives a lot of mental peace and it something that I do for myself. This is my personal experience.

I am thankful to the team members of Pyramid Spiritual Health project and Jagadguru Patriji for this opportunity.
